The RIPPLE Approach

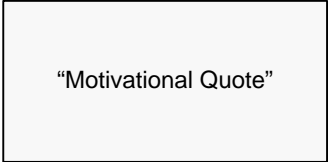

Learn About Ripple

Our Mission

The mission of the RIPPLE institute inc. is to inspiring young people to pursue careers in science, technological, engineering and mathematical fields of study.

“Motivational Quote”

Summary of Goals

Expand the minds of students by exposing them to a wide array of academic, artistic, athletic, and social opportunities,

Provide students with the academic skills necessary for success in higher education,

Help students to overcome class, social and cultural barriers to higher education,

Encourage and guide the academic and social development of students,

Assist students to discover and strive toward fulfilling their potential,

Introduce students to careers in math, science, engineering and technical trades,

Encourage students to become sensitive toward diversity in people, value systems and lifestyles,

Provide an opportunity for students to become familiar with a college campus, thereby encouraging students to pursue a college degree or certificate, and

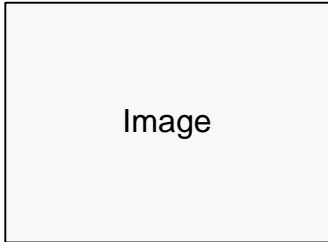

Foster self-confidence, self-esteem, self-discipline and a sense of responsibility in each student in a positive fun safe environment.

Enhance students' understanding of future opportunities by urging them to dedicate themselves to graduation, and to control anger and emotions that threaten to derail their dreams.

Our Vision

RIPPLE institute inc. (RII) will helping to maintain the U.S. as a dominant force in science, technology and education. This will ensure that the flow of scientific talent does not bypass the country's shores, especially in the face of significant competition from other countries for the talent involved. RII will demonstrate a stout commitment to openness by developing streamlined and effective processes.

Image

Our Goals

The primary goal is to establish the RII as a comprehensive program with a record of improving the academic achievement of students from low-income backgrounds while maintaining cost effective operations. To accomplish this goal, the RII will focus on a carefully selected set of high impact interventions aimed at producing significant results in a cost effective manner.

The effects of the RII will go beyond individual student achievement, going deep into the community. The goal is to help build communities with common objectives for change, growth, and development. To accomplish this goal, in each community, in each neighborhood, and in each school, the RII will work to bring together students, teachers, business leaders, and parents to come together with a common goal for their community.

The RII will establish itself as a leader in creative, effective applications of learning solutions to meet the challenges faced by American high school students. To accomplish this goal, the RII will team up students who share similar abilities, interests, commitments, and talents but that come from different socio-economic backgrounds. The result, a stimulating environment designed to encourage students to learn responsibility, self-motivation, community participation, and respect for others.

The RIPPLE Approach

The RIPPLE Approach

RIPPLE combines specific evidence-based curriculum and mentor and student service components into a coherent educational experience for students and RIPPLE staff.

It provides the resources necessary to help promote student retention, academic achievement, career exploration and community service. In addition, to make college enrollment and completion more realistic for typically non STEM aspiring students, RIPPLE offers institutions of higher learning a warehouse of potential future scientific innovators.

RIPPLE has seven structural components and seven program components that, when used together, are closing the innovation gap. RIPPLE institute inc. works with existing assets—community educational systems, existing principals and teachers, and STEM professional.

Example:

Youth learn by doing and seeing how others have accomplished their dreams. Participants will learn competitive job skills and constantly meet with professionals working in STEM fields. Each guest presenter will provide a life biography and outline of their path to success. These encounters will illustrate to the participants the who, what, when, where and how to achieve career goals.

Exposure:

By expanding the horizons of the youth participants to think, hope, dream, and aspire for life achievements beyond their current comfort zones. These excursions will be enlightening and our desire is that they will inspire greatness in the youth of America. Will we attend local art museums, science centers, zoos, national historical sites, and visit architectural masterpieces.

Confidence:

By building self-confidence, self-image, self-discipline in their personal lives RIPPLE is addressing the whole person and these changes will positively affect every aspect of their lives. A positive self-esteem with critical decision making skills are traits and skills needed to yield empowered members of society.

To be successful in the scientific workforce participants will be armed with the inner strength needed to ensure their success. Learning something new and completely different liberates the mind. Facing a challenge, meeting it and mastering it helps build confidence.

Program Focus

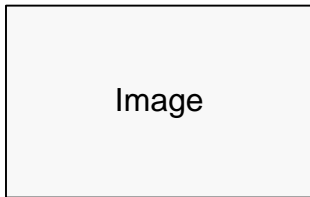

RIPPLE institute inc. (RII) is becoming an influential force for the youth of America to seek careers in the scientific workforce.

Within the next few years, management envisions RII to grow into a sustainable non-profit organization that provides a forum to motivate the most creative young minds in this new generation of prospective scientists, artists, and professionals who will become leaders in society by providing an enrichment opportunity and making them successful in all of their future endeavors.
